Professional Summary

Results-driven Business and Data professional with 7+ years of experience in data analysis, classification, and transcription across media and retail intelligence domains. Proven ability to ensure data accuracy, meet quality benchmarks, and support business insights. Certified Business Analyst with hands-on exposure to Excel, SQL, Tableau, and Power BI. Recognized for strong attention to detail, cross-functional collaboration, and consistent delivery under deadlines.

Work Experience

Senior Data Associate | Numerator

September 2021 – Present | Vadodara, India

- Transcribe and validate bill receipts from US, German, and Korean retail stores with high accuracy.
- Ensure quality and consistency of consumer purchase data used for business intelligence and market research.
- Collaborate with QA teams to identify and resolve data discrepancies, maintaining SLA compliance.
- Contribute to process improvements that enhance transcription accuracy and operational efficiency.
- Support cross-regional data operations covering multilingual store formats.
- Recognized as Star Performer of the Month 15+ times and Star Performer of the Year twice at Numerator for sustained quality and performance.

Data Analyst | TAM Media Research Pvt. Ltd.

December 2018 – September 2021 | India

- Classified media data by Brand, Category, and Company, maintaining a structured and searchable data repository.
- Delivered accurate data categorization supporting advertising analytics and market measurement reports.
- Identified patterns and inconsistencies in large datasets to ensure high data integrity standards.

- Awarded the Josh Award (2021) for outstanding performance and contribution to the data team.
- Coordinated with analysts and business teams to align data classification with reporting requirements.

Projects

Superstore Sales Dashboard

- Tools: Power BI, DAX, Power Query
- Built an interactive sales dashboard to analyze sales performance and identify business opportunities using Superstore data.
- Tracked key KPIs including Sales, Profit, Orders, Customers, and Margin, with dashboard views for monthly trends, region analysis, category analysis, top customers, and top products.
- Added interactive slicers to improve data exploration and support insight-driven reporting.
- GitHub: [Superstore-Sales-Dashboard](#)
